Education

Vellore Institute of Technology, Vellore

B.Tech in Computer Science Engineering

CGPA: 8.31/10

2023 - 2027

Delhi Public School, Sushant Lok

Score: 87.4%

CBSE Class XII

2022 - 2023

Work Experience

SDE Intern | SapidBlue Technologies

May 2026 - June 2026

- Architected an offline-first factory inspection app using Flutter and Node.js, supporting 200+ users in low-connectivity environments with SQLite persistence and auto-sync.
- Launched an admin portal with Vite and RESTful APIs, centralizing real-time monitoring and reducing inspection management process time by 15%, ensuring zero data loss in industrial settings by implementing automatic sync-on-reconnect for a factory inspection app.
- Automated VM and system-level backups in **Veeam Service Provider Console (VSPC)** across multiple operating systems using agent-based methods through VSPC Console and REST APIs.

SDE Intern | AI Core Solutions

June 2025 - Aug 2025

- Implemented a real-time **AI transcript generation and agent system** on **AWS Lambda** with a **Socket.IO**-based communication layer for low-latency updates.
- Delivered a production-grade **React Native** application from the ground up, enabling users to access **AI-powered transcript generation** services through a unified interface.
- Built asynchronous pipelines for **AI backend services** with request queuing, retry logic, and fault-tolerant error handling, **reducing backend load by 30%**.

Projects

Apex Market | *NestJS, AWS, Prisma, Next.js*

- Developed scalable **RESTful APIs** using **NestJS** and **Prisma**, implementing **Role-Based Access Control (RBAC)** and **JWT authentication**, with **AWS S3** for asset management and **AWS SES** for automated email delivery.
- Optimized a **Next.js** frontend using Server Actions to shift data processing server-side, reducing client overhead by **40%** and strengthening frontend-backend integration.
- Improved API reliability through DTO-based validation, centralized exception handling, **Swagger** documentation, CORS configuration, and **Jest/Supertest** test coverage.

Cryptic Hunt App | *React Native, TypeScript, Firebase, Go, GoFiber*

- Developed a **GoFiber** backend sustaining **500+ concurrent requests** during peak gameplay, integrating **Firebase** for live leaderboard synchronization and push notifications.
- Deployed an interactive treasure-hunt application for **500+ simultaneous participants**, featuring NFC-triggered puzzle unlocks, leaderboards, and clue progression.
- Implemented **NFC-enabled gameplay mechanics** on the mobile client, validating physical NFC tags at event locations to unlock in-game stages and synchronize puzzle progression.

ACMOne App | *React Native, TypeScript, NestJS, Firebase*

- Designed the **NestJS backend** for ACM-VIT's official application, developing modular **RESTful APIs** for authentication, event management, registrations, and member operations.
- Created ACM-VIT's **official mobile application**, providing a unified interface for event registrations, announcements, and member engagement for **100+ active users**.
- Delivered **10+ cross-platform screens** spanning onboarding and event dashboards while managing end-to-end deployment and versioning across the **Play Store** and **App Store**.

Skills

Languages: Python, Go, Dart, C, JavaScript, TypeScript

Frameworks: NestJS, React Native, GoFiber, Flutter, Next.js, React.js

Databases: SQL, MongoDB, MySQL, PostgreSQL, Prisma ORM

DevOps: Git, GitHub, Docker, AWS, Firebase, Ansible

Core CS: Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design Basics

Extra Curricular

Projects Lead, ACM-VIT

- Leading and mentoring a cross-functional team of **50+ designers and developers**, overseeing technical architecture, code reviews, and end-to-end delivery of products serving **15,000+ users** across multiple technology stacks.

Certifications

AWS Certified Solutions Architect – Associate (SAA-C03)

DevOps, Agile and Design Thinking - IBM Technology
