Education

Vellore Institute of Technology, Vellore

B.Tech in Computer Science Engineering

CGPA: 8.38/10

2023 - 2027

Work Experience

App Developer Intern | Zeepty

May 2025 – Jul 2025

- Built and shipped core mobile features including real-time push notifications, in-app alerts, and user-facing workflows using **React Native (TypeScript)**.
- Designed and implemented **CI/CD pipelines using GitHub Actions**, automating build, testing, and deployment processes to streamline releases.
- Improved application reliability and performance through release optimisation, asset bundling, and deployment improvements, reducing production crash rates by **20%**.

SDE Intern | AI Core Solutions

June 2025 – Aug 2025

- Engineered a real-time **AI transcript generation and agent system** on **AWS Lambda** with a **Socket.IO**-based communication layer for low-latency updates.
- Built and deployed a production-grade **React Native** application from the ground up, enabling users to access **AI-powered transcript generation** services through a unified, intuitive interface.
- Integrated **AI backend services** with asynchronous workflows and robust error handling.

Projects

Apex Market | *NestJS, AWS, Prisma, Next.js*

- Engineered scalable **RESTful APIs** using **NestJS and Prisma**, implementing **Role-Based Access Control (RBAC)** and **JWT authentication** to enforce access control across user roles.
- Extended the NestJS backend with AWS S3 for asset management and AWS SES for automated email delivery, enabling reliable communication workflows across the platform.
- Developed a Next.js frontend utilising Server Actions to shift data processing server-side, reducing client overhead and enabling tight integration with backend services.

Cryptic Hunt App | *React Native, TypeScript, Firebase, Go, GoFiber*

- Engineered a **GoFiber** backend handling **1000+ real-time requests** during live game sessions, with NFC-enabled gameplay logic, Firebase-backed push notifications, and auth.
- Designed the full **backend event pipeline** - from NFC tag validation to leaderboard state updates - ensuring consistency across concurrent sessions for **500+ users**.
- Implemented real-time leaderboard synchronization and event-state management, ensuring accurate clue progression and seamless gameplay under high concurrent participation during the event.

ACMOne App | *React Native, TypeScript, NestJS, Firebase*

- Built the **NestJS** backend for ACM-VIT's official app, implementing RESTful API routes, enabling structured data flow between server and client.
- Delivered a cross-platform **React Native** app with **Firebase Authentication**, serving **100+ active users**.

Skills

Languages: C, C++, Kotlin, Dart, Java, Python, JavaScript, TypeScript, SQL, Go

Frameworks: NestJS, FastAPI, GoFiber, React Native, Flutter, Next.js, React.js

Databases: MongoDB, MySQL, PostgreSQL, Prisma ORM

DevOps: Git, GitHub, Docker, AWS, Firebase, Ansible, CI/CD

Extra Curricular

Projects Lead, ACM-VIT

- Leading a team of **50+ designers and developers** to build technical products used by **15,000+ users**, overseeing end-to-end development across multiple technology stacks.

Certifications

DevOps, Agile and Design Thinking – IBM Technology
